

# How To Use Your Project Planner

Trying to do a job without the right tools is hard work. The good news is that with the knowledge you've gained from reading your Essential Checklist together with this Project Planner, you have the tools you need to produce the perfect electrical plan for your new home or renovation. Once your plan is completed, present it to your builder, architect or electrical contractor to work from. Better still, book a Clipspec consultation, go through it with our experts to ensure everything is perfect, and receive a fully costed, itemised list of what's needed for the job.

You can download more Project Planners at [clipsal.com/projectplanner](http://clipsal.com/projectplanner).

With your Project Planner, creating a perfect electrical plan for your home is as easy as A, B, C.

## A. Contact

Tear out this Project Planner and write in your contact details.

Name:

\_\_\_\_\_

Address:

\_\_\_\_\_

\_\_\_\_\_

Phone Number:

\_\_\_\_\_

Record your details above so you are able to give your completed Project Planner to your electrical contractor for quoting.

[clipsal.com](http://clipsal.com)

Everything electrical is only a click away

## B. Preferences

Read through pages 12-41 of your Essential Checklist and consider the requirements for every room in your home.

Read pages 80-107 of the Essential Checklist and choose your preferences on energy efficient solutions, styles and colours.

Record your product preferences on the Project Planner as you go.

## C. Planning

Read through pages 52-69 of the Essential Checklist for the various home networking and automation options.

Record your home network and automation preferences (C-Bus, StarServe, Multi-Room Audio) on your Project Planner.

## Easy Home Electrical Planning with Clipsal

### Home electrical planning is easy with Clipspec

Planning your home electrical is easy with a Clipspec consultation, available exclusively through builders and Clipsal Powerhouses. If you live too far away, you can even have a remote consultation over the Internet. An expert Clipspec consultant can walk you through it over the phone (ADSL2+ connection required).

With the help of a Clipspec consultant, you can design all of the electrical needs for your home in one simple meeting. Clipsal's Clipspec software is a powerful design program that creates a custom electrical plan to match your home and lifestyle perfectly.

This combination of exclusive software and expert advice ensures your electrical plan is just right and prevents problems, such as power outlets and switches being installed in the wrong place.

During a Clipspec consultation you can choose and change your selections at the click of a button, and receive with an exact costing, so you can work within your budget.

When your consultation is completed, you'll be provided with a tailored electrical plan that can be used by your builder. The plan even includes catalogue numbers, ensuring your builder orders exactly the right products for your home.

When a Clipspec participating builder refers you, your consultation is free, so ask your builder if they are part of the Clipspec network.

If you require expert advice about your home's electrical plan, make an appointment with a Clipspec consultant at your local Powerhouse. Go to [www.clipsal.com/clipspec](http://www.clipsal.com/clipspec) or call your local Clipsal Powerhouse.

### Your next steps

The Essential Checklist should have provided you with plenty of inspiration, but how do you transfer your ideas from a piece of paper or in your head, and turn them into reality? There are a few different scenarios that can influence the answers to this question:

1. You've got a builder
2. You're using an architect
3. You're an owner/builder
4. You need a Clipsal Endorsed Contractor.

For more information on these scenarios turn to page 108 in your Essential Checklist.

### Where can you see more Clipsal products?

- Visit a Clipsal Powerhouse Display Centre.
- Visit [clipsal.com](http://clipsal.com)
- Speak to an expert - your builder, architect, electrician or integrator.
- Go to builder display villages; many have Clipsal products installed.
- Look for Clipsal displays at home shows across Australia.

### Clipsal in action at your nearest Powerhouse

Clipsal Powerhouses and Selection Centres are open 9am to 5pm Monday to Friday. Call now for a Clipspec consultation appointment and walk through the showroom to see Clipsal products on display.
