Saturn OneTouch

Touch-sensitive switches and dimmers

clipsal.com/onetouch
Saturn OneTouch

In touch with your style
The stylish Saturn™ range of switches has now been extended to include the new electronic Saturn™ OneTouch range. Designed to complement the Clipsal™ Saturn Series, benefits of Saturn OneTouch include a glass-look fascia, advanced touch-sensitive interface, multiway dimming and switching, cool blue LED indicator, and an audible on/off tone. Saturn OneTouch is available in one to six touch-control wall plates, one and two gang architrave, and two gang fan control versions.

Touch-sensitive technology
The innovative Saturn OneTouch range utilises electronic switch and dimmer technology to provide unique touch operation. One touch of the wall switch will turn the light on, and an extended touch will dim the lights up or down. The LED indicator shows which switch is in use — and falls back to a subtle glow when the light is off.

A switch for every application
The Saturn OneTouch switch can be used for many different load types such as lights or exhaust fans. Reliable switching is ensured from up to three different locations, like in a large living area.

A colour to suit your style
The Saturn OneTouch range comes in a selection of colours to match the style of your interior décor. Available in three colours of Pure White, Espresso Black, and Ocean Mist. So, you can rest assured that the wall switches will match the power outlets and data points throughout your home, creating a seamless and stylish solution.

Dim with ease
Utilising powerful and sophisticated microcontroller-based technology, the Saturn OneTouch dimmer is perfect for dimming and switching of Clipsal LED lights from up to three locations.

Create the perfect ambiance
A great feature of the Saturn OneTouch dimmer is the inbuilt memory function to remember the last dim setting, so when the light is switched back on, it will turn on at the previous dim level.

This handy feature provides easy replication of your required lighting levels while creating the perfect ambiance in your home.

Robust and reliable technology
The Saturn OneTouch range has been specifically designed with intelligent load handling features and various protection devices that make the switches and dimmers rugged, robust, and reliable.
