Life Is 

by Schneider Electric

Come home to Iconic

The beautiful electrical accessories range from Clipsal, where style meets clever efficiency.

From standard switches and power points, to simple smart home functionality, Iconic is the new standard in modern living for every home.

Infinitely customisable

Clipsal Iconic introduces new opportunities for customisation designed to enhance functionality, aesthetic appeal, and usability. Iconic has a modular design so it's easy to make upgrades as needs change.

Pictogram identification

Tired of flicking multiple switches until you find the right one?

With Iconic, it's easy to replace plain switch rockers with a variety of pictograms, to get the right switch first time, every time.

LED indicators & locators

Iconic gives you the option to add subtle warm white LEDs to every switch.

You can set them as indicators to show which switches are in use; or as locators, so it's always easy to locate a switch in the dark.

Future-proof 'skinability'

Iconic is based around a unique, electrically safe grid plate, with a choice of three different skin designs that simply clip on top.

Once the grids have been installed by an electrician, it's safe for anyone to change the skins at any time. Simply clip off the standard skins and clip on the new design.

Iconic®. Irresistibly future-proof.

With four colours that complement any décor, Iconic's translucent edges allow the cover plates to pick up background colours for a design that blends in with any wall colour.

The Iconic range also offers Vivid White with a white solid edge in selected switches and power points for a sleek, clean look.

Iconic® Styl. Irresistibly modern.

Iconic Styl adds elegance, texture and modern simplicity with three metallic finishes to complement a broad range of décor styles.

These slim, stylish skins are designed to clip directly onto standard Iconic grids and are sure to make a statement in any home.

Iconic Styl is an irresistibly beautiful design made from durable aluminium material with a high quality anodised finish. The surface is sandblasted for a modern 'satin' appearance and the rounded edge plays with light creating beautiful reflections.

Iconic® Essence. Irresistibly elegant.

With smooth round wooden edges, Iconic Essence brings a hint of nature to the home. Inspired by classic comfort and elegance, the natural real timber craftsmanship utilises high quality, sustainable materials to complement the room.

Iconic Essence has been designed and made using durable ABS colourfast and a UV stabilised plastic surface and birch real timber edge with matt lacquer for protection.

Designed to clip on to the Iconic platform – upgrading has never been easier.

Clever Home-enhancing Features

Smart charging. Handy shelf.

Iconic has multiple USB charging options, from a twin socket with dual USB charger to a three-socket USB charger with an integrated shelf to hold your smart devices.

This helps avoid “clutter” on benches and tables while your devices are charging. It’s ideal for bedrooms, kitchens, and family areas.

Home connectivity

Clipsal Iconic offers a wide range of home connectivity options allowing you to easily connect your home computers, smart devices, TVs and audio equipment.

As well as the latest design of data, phone, HDMI, AV, and TV sockets to connect your cabling, you have the flexibility to mix up to six different options within the one Clipsal Iconic wall plate for the ideal combination to suit your needs.

Energy-saving features

A motion sensor switch offers hands-free control of lights. It’s perfect for those times when you have your hands full, like in the pantry, walk-in robe or staircase.

The motion sensor stays on long enough for you to do what you need to, but not long enough to waste energy.

Lights the way

Night Walk makes night time navigation safer, easily plugging into an Iconic double power point. When movement is sensed a soft-glow LED discreetly lights the way.

Or easily convert it to a subtle night light, ideal for kids’ rooms or wherever a constant low-level light source is needed.

Connected Home Solutions

Clipsal Iconic offers clever home enhancing features for simple smart home functionality with connected control of your switches. You can control a range of functions and set schedules around your home using intuitive app control to make life easier.

Iconic features smart switches, timers, time-clocks and dimmers which can be controlled from the intuitive Wiser Room App on your smart device. Devices connect only when needed, using Bluetooth Low Energy. These simple innovative products provide a level of convenience and energy management to enhance your life.

The best thing about a Clipsal Iconic connected home, is that it is a completely scalable and customisable solution. You can upgrade each Iconic switch to a smart switch at any time and this is just the start of your smart home experience.

Push-button Switches

You can have complete control of the lighting for your whole home, and it's all done from the Wiser Room app on your smartphone or tablet.

Wiser Dimmer

Provides in-room on/off and superior dimming control of lights from your smart phone or tablet using the Wiser Room app, with 24-hour timer and 24 hour/7 day scheduling functions.

Timers and Time-clocks

With Iconic timers and time-clocks, you'll not have to worry about forgetting to turn off light switches or other devices. Program schedules using the Wiser Room app. Ideal for exterior lighting, heated towel rails and more. You can even automatically adjust to sunrise and sunset times.

Multi-way Control

Iconic electronic push-button and smart switches have ControlLink, so that lights can be switched and dimmed from multiple locations. Perfect for bedrooms, staircases, hallways and open plan living areas.

Wiser Room App
