Welcome to a Wiser home

Staying on top of a household budget can be a challenge. With the help of **Energy Management by Wiser™**, you can make this task easier for your customers.

A smart, connected technology for homes, Wiser gives homeowners **24/7 visibility** into the key energy parameters of their home. This means they can **stay on top of their electrical installation, maximise solar performance**, and save on **energy bills**.

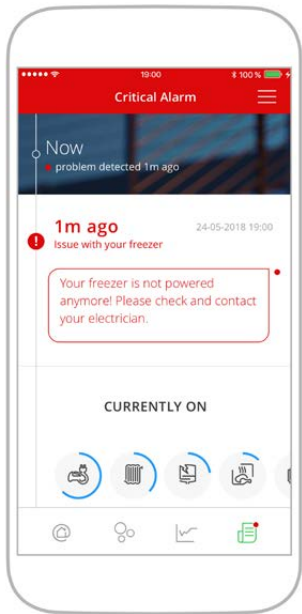

The results? **Greater efficiency and convenience** for your customers, every day. And **new business opportunities** for you.

That's the Wiser difference.

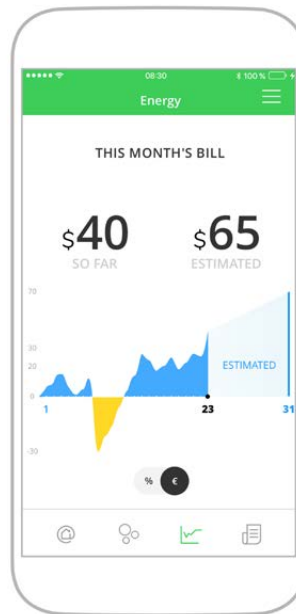

Give your customers the gift of insight

With Energy Management by Wiser, your customers can make better energy-related decisions, improve home safety, and increase their peace of mind.

Insight and notifications

- Real-time information on installation condition
- Alerts on detected issues
- Precise issue diagnosis
- Remote management of critical equipment, such as hot water systems, pool pumps and electric vehicle (EV) charging

Energy savings

- Electricity consumption tracking
- Estimating energy bills and setting a monthly budget
- Information on solar production/consumption and EV charger energy use and status
- Schedules for critical equipment to benefit from lower electricity rates

Top solar performance

- Monitoring and scheduling solar energy use to maximise self-consumption
- Real-time insight into energy production
- Alerts if solar production is lower than expected

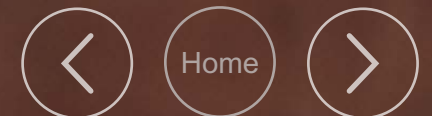

Become a solar energy adviser

Making the most of a home solar installation requires **active energy management**: switching between self- and grid-consumption at the right time, and choosing between selling and storing energy.

Connected to a solar energy installation, Energy Management by Wiser provides **real-time insight into energy production, battery charging,** and **sends alerts on anomalies**, such as solar production levels that are below expectations.

This lets homeowners **optimise their energy spending** and **achieve a better return on their solar investment**.

Help homeowners achieve better performance of their solar installation.

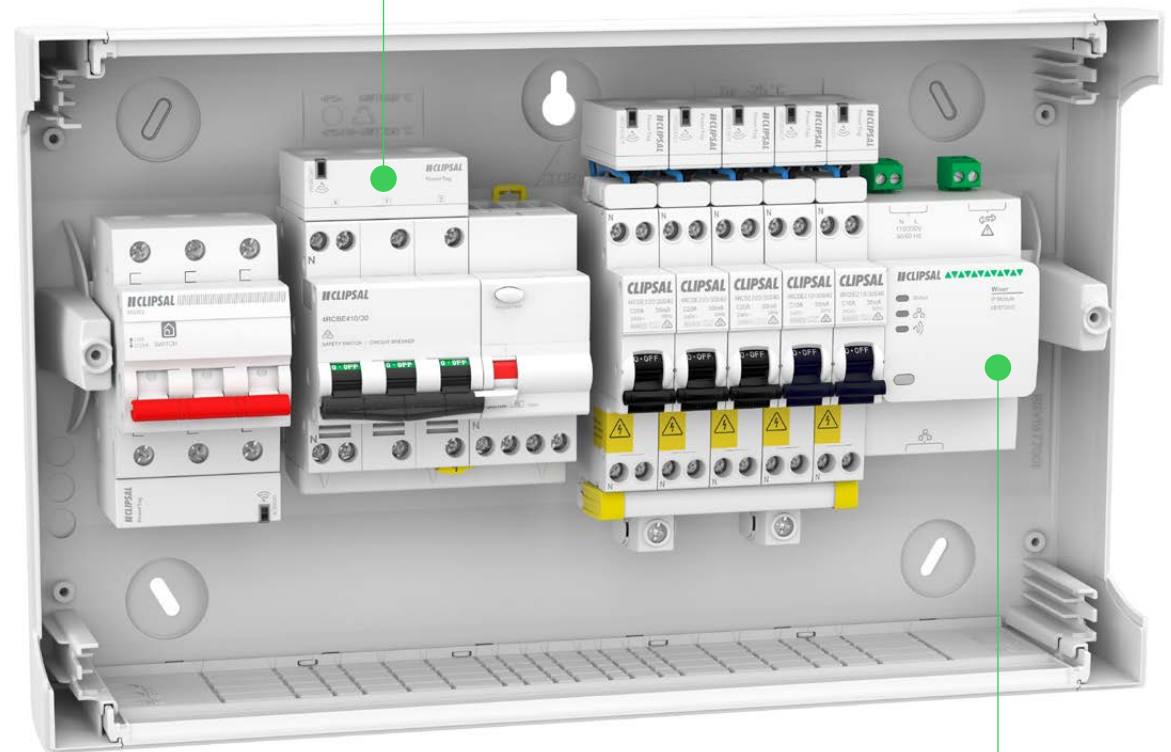

How Energy Management by Wiser works

At the core of Energy Management by Wiser are smart, connected devices installed directly into the switchboard.

They collect data across the electrical installation at home, 24/7, delivering aggregated information straight to the homeowner's smartphone or tablet via the Wiser app.

PowerTag E –
Energy Sensors

Wiser IP Module

Discover Wiser products

PowerTag E – Energy Sensors

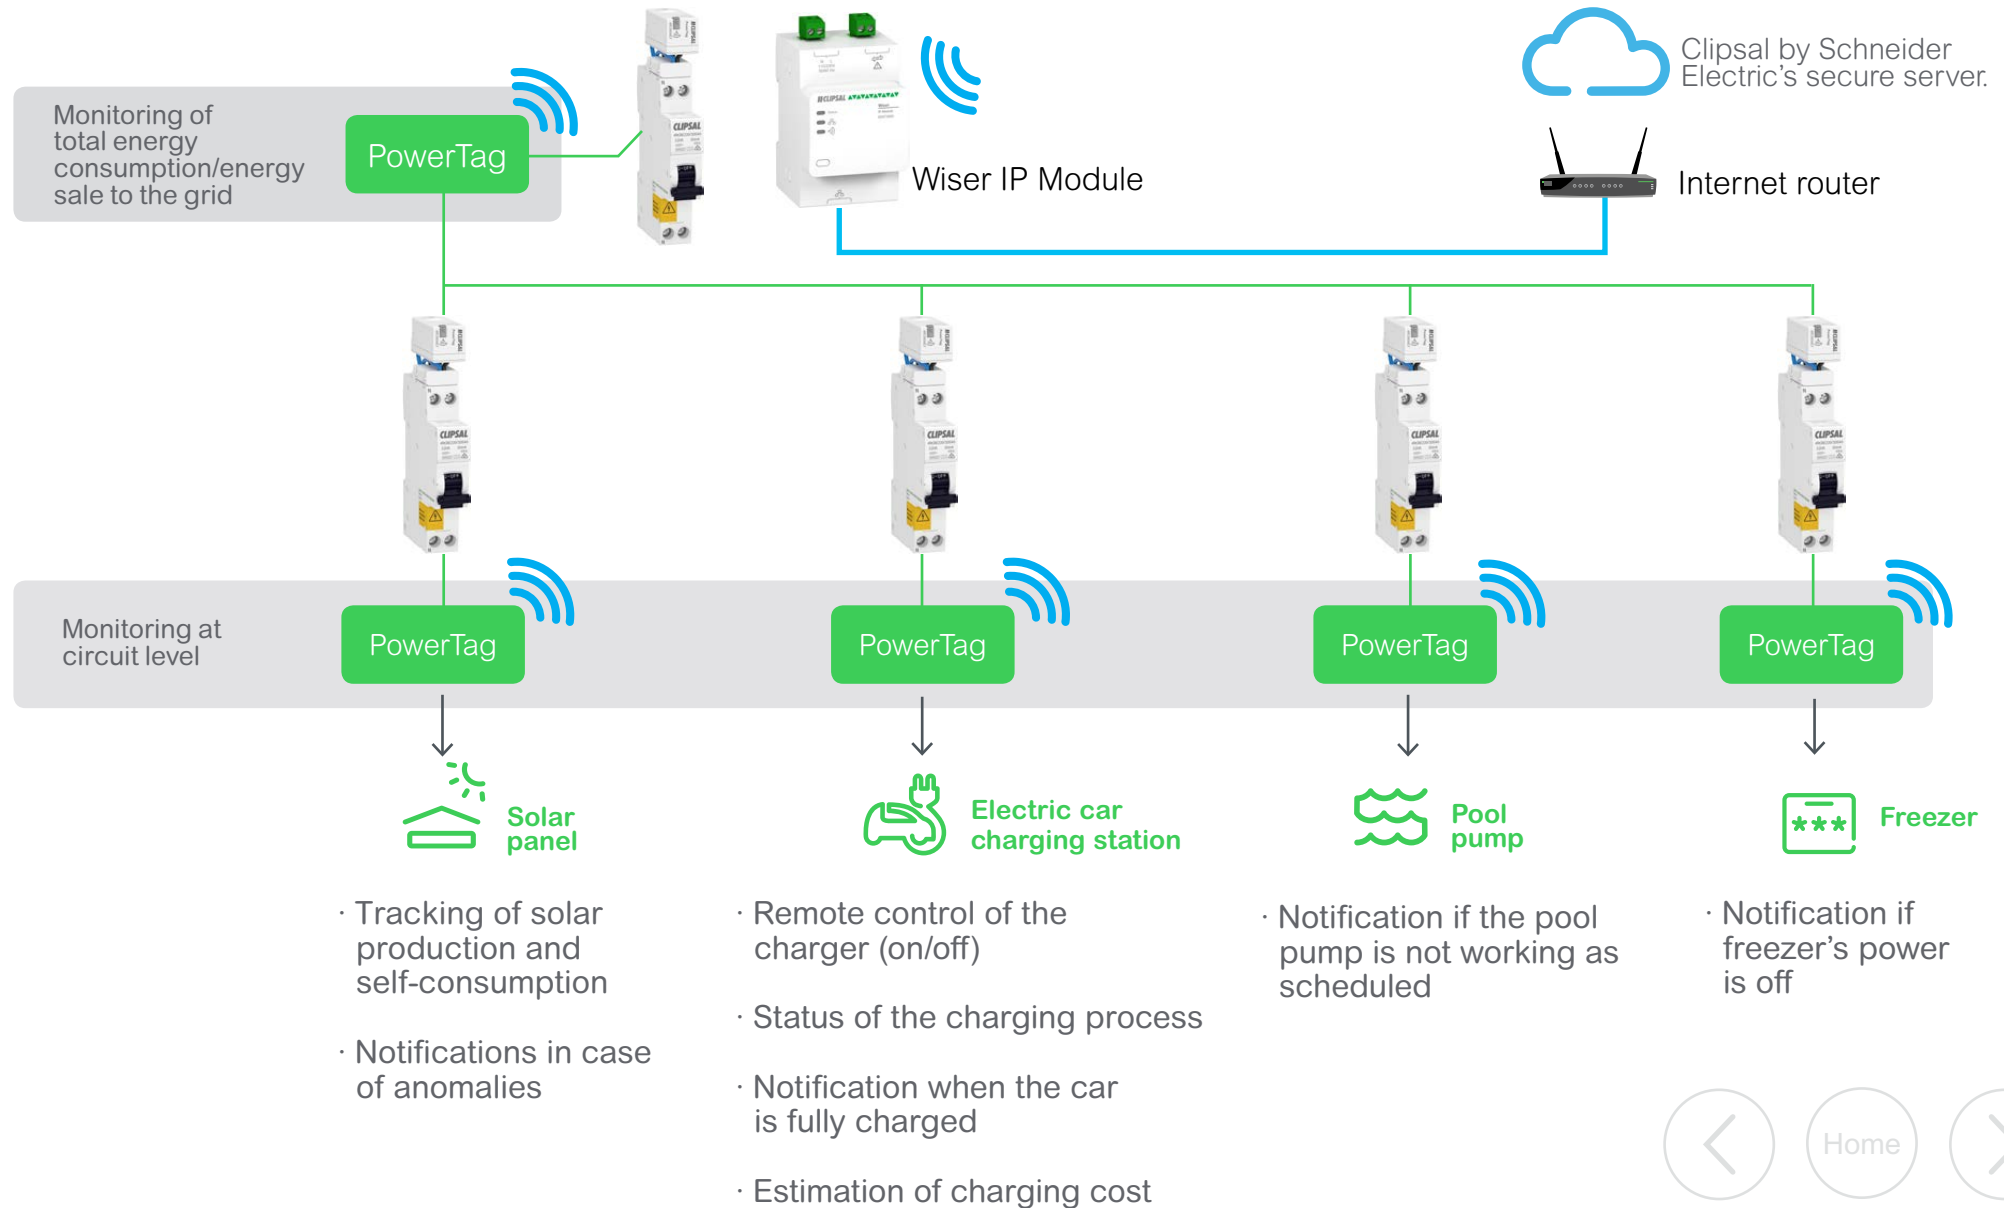

This wireless sensor measures energy and power in real time to enable precise load management and fault detection. It's mounted on a circuit breaker.

Wiser IP Module

A device that collects data from across the installation and transfers it to the Wiser app. Works with the wireless PowerTag system.

An example of Wiser home architecture

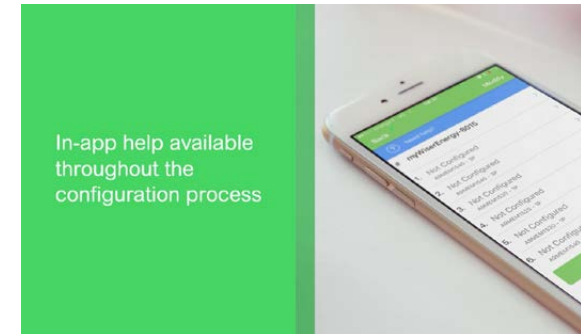

Save time on installation and commissioning

Designed for quick installation in new and existing switchboards, Energy Management by Wiser is quick and easy to commission via the eSetup for Electrician app, which is free to download.

How to set up Energy Management by Wiser:

1. Install Wiser devices into your customers switchboard.
2. Download the eSetup for Electrician app to your smartphone.
3. Connect with your customer's switchboard through the app using Bluetooth.
4. Follow the instructions to set up Wiser functions.
5. Introduce your customers to the world of Wiser energy choices.

Download the eSetup app today

Commissioning Energy Management by Wiser is simple thanks to the eSetup for Electrician app!

You don't need a PC or complex tools to configure the system – everything can be done via smartphone thanks to the **eSetup for Electrician app**. Connect to the installed Wiser products through Bluetooth and use the app to configure all of the necessary settings, including:

- Define the system
- Set the products
- Verify and test the installation

Download it today!

Broaden your expertise as an EcoXpert

Join our Home EcoXpert program and become an official partner for more growth and support opportunities. Register through the Club Clipsal program to get promoted on our website, gain access to training, and differentiate yourself with EcoXpert signage.

With Energy Management by Wiser and Clipsal by Schneider Electric, growing your business has never been easier.

How to become an EcoXpert

- Take part in connected offers training
- Conduct your first Wiser installation and let us know
- Become a member of the Club Clipsal program by registering online
